Single Use Instruments

Single use surgical instruments protect patients from infection. They are also cost effective, especially when compared to the whole cost of using reusable instruments including initial purchase, the cost of replacing lost instruments and repairing broken ones and transportation to and from sterilising centres or the cost of running a desk top steriliser.
PRODUCTION VIEW
Thanks to continuous innovation and the use of certified raw materials, JURAT SURGICAL COMPANY has succeeded in creating a complete range of instruments capable of satisfying the most sophisticated needs of an international audience both in terms of quality and range.

Thanks to good relationship with clients and satisfaction of our clients.

To Date

JURAT SURGICAL COMPANY is present with its own branch in Italy.

JURAT SURGICAL COMPANY based in Sialkot The home of surgical, sports and leather industries,

We welcome you to visit our factory or contact us directly. We shall provide you our best services.
MANUFACTURING PROCESSES

FORGING
• Selection of forging process, i.e. Hot, Warm or Cold forging
• Forging process apply on instruments/devices (Hot, Warm or Cold) for shaping metal parts.
• Trimming of excess material and acid cleaning

MILLING AND TURNING.
• Cutting away the unnecessary material by milling machines
• Making Serrations, Ratchets, Male & Female box Joints and grooves.

FILING, GRINDING & SETTING.
• Removing of irregularity by grinding wheels and files so instruments develop its final shape.
• Initial setting of instruments by hand with different type of gauges

HEAT TREATMENT
• Heat treatment is significant process to improve performance and strength of instruments
• Heat treatment process is done to change physical and mechanical properties of instruments without modification of original shape of instruments
• For soften the material /metal Annealing process done.
• Hardening/Tempering process is done to produce durability in the instruments.
• Rockwell hardness (HRC) of needle holder without tungsten carbide inserts around 40-48 while scissors among HRC 50-58

Electro-Polishing:
The Electro-Polishing Departments are also manned by skilled & trained workmen using the imported chemicals and the grinding wheels to ensure the best-quality finish.

Tungsten Carbide:
Our T.C Department is installed with the best-quality imported machinery being manned by the exceptionally well-trained experts using the German Technology.

Passivation:
Using the top-quality imported chemical in our Passivation Department we passivate and boil test each and every instrument before packing, subjecting every piece to 24-hour treatment, and if need to be re-passivation process so as to eliminate any chances of rusting / Corrosion etc.

Sandblasting:
For sandblasting our instruments, we use the machines as well as the best quality sandblasting material, which are operated by skilled & well trained operators.

FINAL INSPECTION
To make sure quality of instruments per desired specifications final checking /inspection done by qualified technician.

MARKING/LABELING/PACKAGING
Marking/Printing process done by laser marking system, Etching or screen printing. Packaging done per desired specification.
